

Designed exclusively for the A/V Professional.

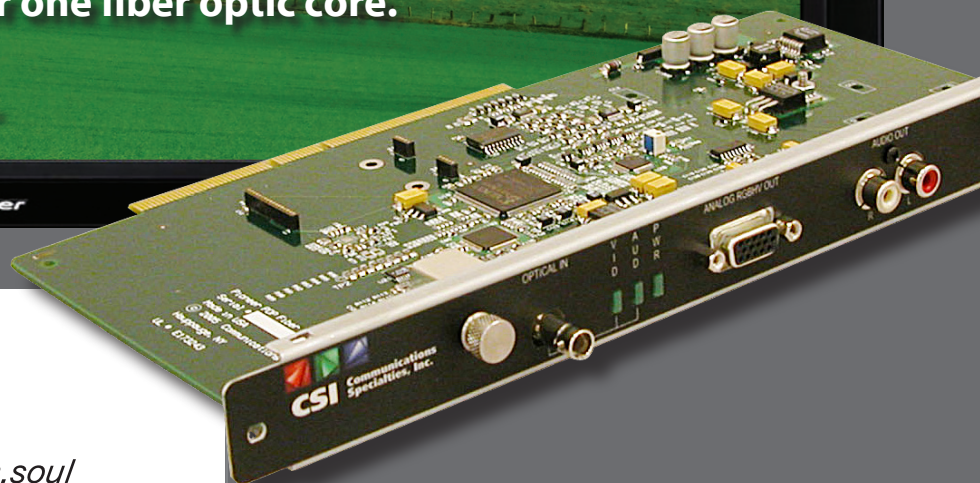

# Picture perfect performance.

**Pioneer Plasma Displays\* deliver exquisite black levels, contrast and color fidelity.**

**Communications Specialties' Pure Digital Fiberlink® 7220 Series delivers high-res RGB and stereo audio over one fiber optic core.**

**Together, it's a picture perfect partnership.**

**Pioneer** *sound.vision.soul*

When it comes to the demanding Digital Signage market, A/V Professionals turn to Pioneer plasma displays. And, to distribute and manage the high-resolution RGB and audio signals, they depend upon the Pure Digital Fiberlink® 7220 Series. With support for RGB up to WXGA and HDTV up to 1080i, transmitted over a single fiber, the 7220 Series makes it a cinch to deploy point-to-point, point-to-multipoint or drop-and-repeat installations. Best of all, with the Pure Digital Fiberlink 7230 plug-in expansion card for Pioneer plasma displays\*, you can run your fiber directly to your display.

**Pure Digital Fiberlink®. Truly. Purely. Amazing.**

## Pure Digital Fiberlink® 7230 Series Plug-In Expansion Card for Pioneer Plasma Displays

- Receives high-res RGB and stereo audio over one single mode or multimode fiber.
- Receives signals from any transmitting unit within the Pure Digital Fiberlink 7220 Series.
- Supports VGA, SVGA, XGA and WXGA, and HDTV resolutions of 480p, 720p and 1080i
- Uses all digital processing for crystal clear signals and no color pixel skewing.
- External baseband output provides input for second local PDP or other device.
- Optional active optical loop-thru for transmission to additional PDP receiver card or 7220 Series receiver.

\*Models PDP-427CMX, PDP-507CMX, PDP-607CMX.
